FORKLIFTS - COUNTER BALANCE ICE

NEW - SALE

Date Listed 22 Mar 2020

Power Type LPG / Natural Gas

ADDITIONAL INFORMATION

EP - 1500 kg - 3500 kg T seriesThe new T8 series from EP is built with EP's own transmission which is mounted on large rubber suspension arms and is attached to the engine through a drive shaft. The result of the new transmission is extraordinary with virtually zero vibration reverberating through the truck and the overall noise level of the truck is very low. The new transmission also has a major impact on the responsiveness of the drive of the truck where the power of the engine is transmitted to the front axle in a very smooth and direct fashion
